

2021 Fourteenth National Doctors of Nursing Practice Conference

Protecting the Heart of the Veteran

Implementation of a Modified Early Warning
Scoring System (MEWS) on Acute Care Remote
Telemetry Units in a Large Veterans Administration
Hospital

Cheryl Manjengwa
DNP, RN, CNL, NE-BC

Background

1

- ❑ In-hospital cardiac arrests
- ❑ Diminished Quality of Life
- ❑ Vital Sign Trending

Problem

Aim

3

The aim of this project is to increase the use of a MEWS by nursing staff on acute care medical-surgical telemetry units at a large Veterans hospital from 0% to 90% with 3 months to increase proactive identification of deteriorating patients.

Methods

- Team assembly
- Baseline data collection
- Education
- Plan, Do, Study, Act (PDSA)

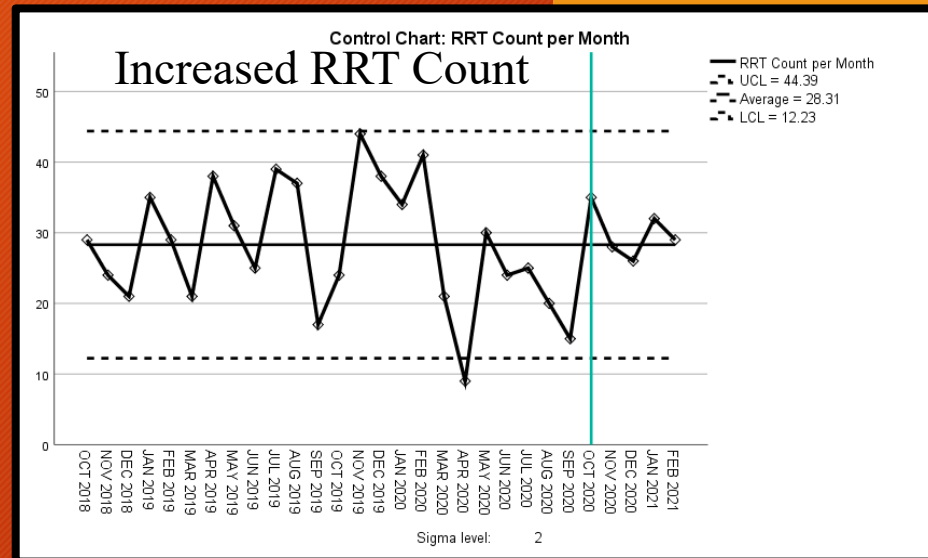

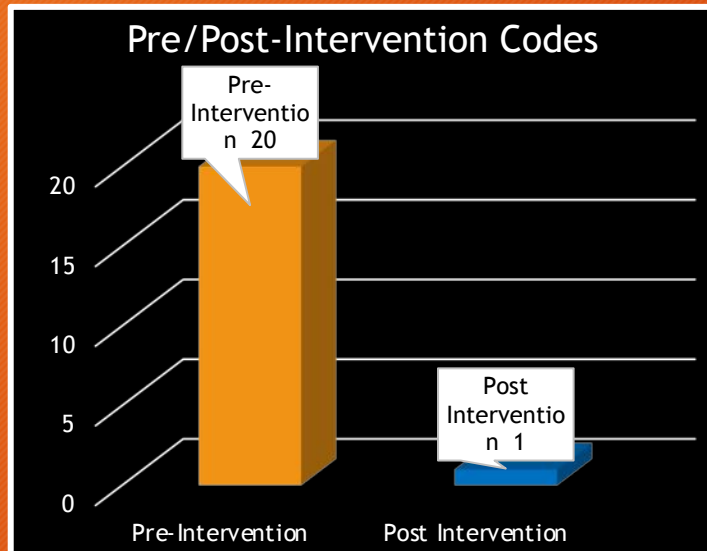

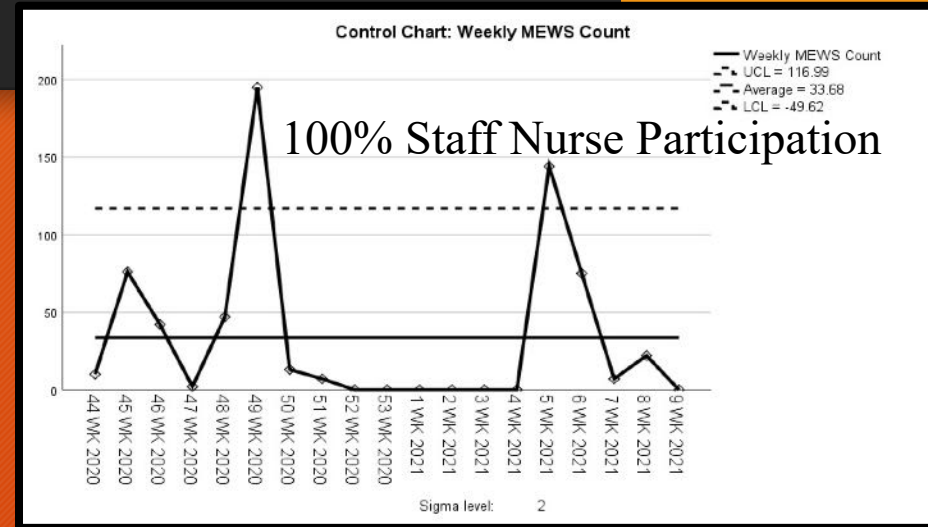

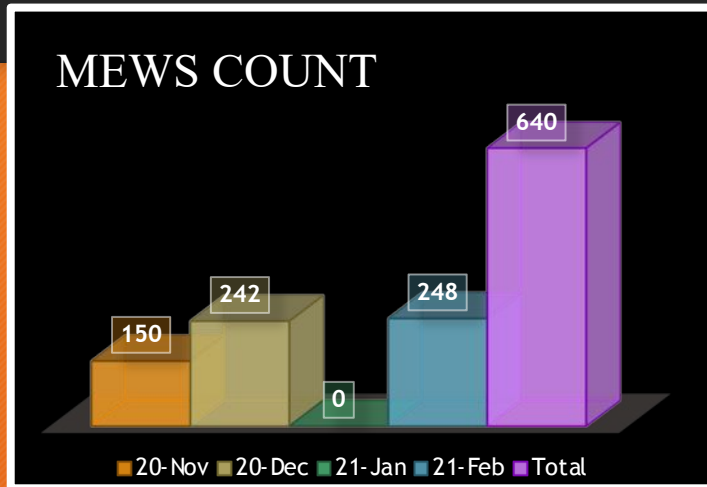

VANTHCS 6c Pilot Modified Early Warning System Tool & Action Algorithm							
Score	3	2	1	0	1	2	3
HR		≤40	41-50	51-100	101-110	111-129	≥130
Systolic BP	<70	71-90	91-100	101-180	181-200	201-220	>220
RR		<8	8-11	12-24	25-29		≥30
Temp F	<93.2	<93-95		95-100.4	100.6-101.3	>101.3-104	104
C	<34	34-35		35.1-37.5	37.6-38.5	38.6-40	>40
CNS/LOC Any change in baseline neuro status requires notification of provider	Unresponsive	Responds to pain only	Responds to Voice	Alert		Confused or agitated	

4

MEWS Score	Inpatient Action	
0-2	Green	Re-Score using routine vitals. Observe Q2-4
3	Yellow	<input type="checkbox"/> VS and reassessment in 2 hours. Calculate MEWS <input type="checkbox"/> Inform charge RN <input type="checkbox"/> Obtain order to place telemetry
4	Orange	<input type="checkbox"/> VS and reassessment in 1 hours. Calculate MEWS <input type="checkbox"/> Inform charge RN <input type="checkbox"/> Notify provider <input type="checkbox"/> Call RRT if Veteran clinical picture is deteriorating
5-6	Red	<input type="checkbox"/> VS and reassessment minimum every 30 minutes with MEWS score <input type="checkbox"/> Inform charge RN <input type="checkbox"/> Notify MD <input type="checkbox"/> Call RRT

Results

Conclusion

- Limitations
- Office of Nursing Service Directive
- HRO Principle - Preoccupation with Failure
- Improved
 - Staff Nurse Confidence in delivery of Quality Care
 - Veteran safety
